

Safe-One™

The All Natural Solution for Lagoon Waste Remediation

Alpha Ag Solutions brings you Safe-One™, our custom blended, robust liquid microbial treatment developed to break down sludge and waste nutrients from livestock waste lagoons. Safe-One™ does its work over time in an all natural and safe way, containing no harsh chemicals. Safe-One™ was designed to provide effective and measureable results. Even better, we customize treatment schemes to fit your particular needs, providing assistance and support throughout the entire process.

Safe-One™ provides effective and proven results with lagoon waste remediation:

- Provides safe, cost-effective treatment for feedlot, dairy, swine, and poultry operations of all sizes
- Reduces the concentration of nitrogen, phosphorus, and ammonia in wastewater and associated odors
- Liquefies sludge and other waste material in lagoons, reducing pumping and disposal costs
- Over time lagoon waste water can be used for irrigation
- Increases pumpability, reduces pivot maintenance
